
The Craftsman Village Historic District Newsletter

September/October 2011

A word from the Co-Chairs

We hope you have all had a wonderful and relaxing summer. Believe it or not, next week thousands of smiling parents will be sending their children back to school. Please be extra alert when driving especially near schools or in the morning/afternoon student commute.

What's Happening To Our Streets?

You may have noticed the "No Parking-Tow Away" signs which have been springing up in the neighborhood, especially along Orange Avenue and on 7th Street. While this may prove to be a major inconvenience in the short run, the long term benefits are worth it. The Orange Avenue/7th Street Sewer upgrade project began in earnest on September 6th. It is tentatively schedule to run through January 16, 2012 barring problems or inclement weather. If you have not received one of the letters distributed by the Long Beach Water Department you may wonder what's happening. The project will upgrade 1300 linear feet of 8-inch sewer pipe to 12-inch extra strength sewer pipe as well as upgrade 1,775 feet of 24-inch pipe to 30-inch pipe. The construction hours are tentatively scheduled for Monday-Friday from 8:30 AM – 3:30 PM. The water department's plans are available on-line or we will be posting a link on the Craftsman Village Website. The project is set to begin at 11th and Orange, then head south towards 7th street. From there it will travel east on 7th street to its completion at Walnut Avenue. One of the goals of this project is to avoid potential sewer back up issues. If you have questions or concerns, the major players involved are:

Verner of Cedro Construction – (805) 827-0977

Lenny Blackman, Field Construction Inspector – (562) 618-5935

Patrizia Hall, Sr. Civil Engineer Long Beach Water Department – (562) 570-2332

The co-chairs have already contacted the 1st and 2nd city council offices in regards to this project. They understand the impact this will have on parking in our neighborhood, especially during the holidays. They will keep in touch with the water department and the contractor to minimize the impact on neighborhood residents as much as possible.

Long Beach Historical Districts Meeting

On Saturday August 27th, Karen Highberger of the city's Cultural Heritage Commission and a long-time resident of Cal Heights hosted a meeting for all of our historical districts. David Waller of Long Beach Heritage was there as a resource and members from the historical districts of Belmont Heights, Bluff Heights, Bluff Park, California Heights, Craftsman Village, Linden Avenue, and the Willmore Historical District were in attendance. The focus on the meeting was to assess the needs of historical districts and to determine ways we could encourage the city to give greater emphasis on preservation. Topics of discussion included certificates of appropriateness, 'weekend warrior' projects that are completed during code enforcement's off hours, as well as the possibility of having on-call weekend support to report potential abuses. Hopefully, the city services will be more supportive of districts' attempts to preserve our heritage.

Restoration Trade Fair

Please join your neighbors for the 4th Annual Restoration Trade Fair at Luther Burbank School. Craftsman Village will be amongst the other historic districts participating in this informative event. We need volunteers to sit at our booth for the following times:

1 person for 11:30-1:30; one person for 1:30-3:30. Please call Michelle at 599-3559 if you can help. The Restoration Trade Fair has something for every taste and interest. History buffs will enjoy a WWII documentary called 'Long Beach Working Hard'. Those wishing to learn a new skill can watch demonstrations on window glazing, blacksmithing or basket weaving. Many local vendors will be on hand with their merchandize and restoration ideas and advice. You can even bring a picture of your home with

a list of questions to ask the variety of experts and others who have had similar experiences. SAVE THE DATE-SEPT 25-You will not be disappointed!

Mini Clean-Up Teams

Residents on Hoffman Ave. and Orange Ave. are confronting the issue of litter on their streets. These neighbors have agreed to check their respective street on a regular basis (2-3 times per week) and pick up any trash they encounter. The trash bags and gloves are being provided by Neighborhood Services through the assistance of Gonzalo Sanchez. We appreciate and thank our neighbors for their efforts in keeping our neighborhood clean. Perhaps they will encourage others to do the same.

Window Work at Hoffman

Perhaps you have noticed the construction that is happening at the duplex at Hoffman and the alley. The windows are being replaced with newer vinyl windows. This is being done with a permit and is allowed, not necessarily recommended, because this property falls outside of the historic district boundaries.

Another property, which is located at 1418 E. 9th St., is having its windows replaced also. But, in this case, they have a permit, a Certificate of Appropriateness and the windows being used have been approved by the Cultural Heritage Commission.

Please be advised that any exterior changes that are done to your home need a permit and a Certificate of Appropriateness. It is also advised to restore and maintain the original quality of your home's interior features.

Note: The windows used at the 1418 E. 9th project can be purchased at B&B Hardware. They are manufactured by Paramount.

Nuisance Abatement/Neighborhood Problem Solving

While living next door to a problem property can be extremely difficult, please remember that there is a city Nuisance Abatement program to assist you in dealing with these issues. 562.570.5257 is the phone number or Peter.Ronca@longbeach.gov

Did you See?

Did you happen to see the articles on *Titi's Ice Cream* in 'Cuisine Magazine' and the "Downtown Long Beach Business Journal"?

Hellman Speed Limit Signs

Thank you to the 2nd district for having speed limit signs posted on Hellman Street – this was a result of our meeting with the city traffic engineers. We are still pressing the city for additional traffic calming and beautification measures for our area such as the beautiful new roundabouts that were added to Vista Avenue in the Belmont Heights area.

Digital Speed Signs

Traffic and speeding cars have been a hot topic of conversation at many of our meetings. Neighbors are frustrated and concerned about their safety and the safety of their children. Craftsman Village has been working diligently to find some solution to this problem. We have met with the city Traffic Engineer and one of the possible solutions was to install digital speed signs along Orange Ave. Our 1st and 2nd Council Offices have generously agreed to pay for these two signs. Please take the time to call our council representatives to thank them. Your historic district is also working to have speed humps installed on our three east/west streets; Hellman, 8th and 9th. We encourage you to make a phone call in support of installation of speed humps-1st District Office-570-6919 and 2nd District Office-570-6884. If you don't speak up, your concerns will not be heard!
